New Patient Guide

Welcome to Maplewood Dental Studio! This guide explains how to prepare for your first visit.

Before your visit

Fill in the new patient forms on the patient portal at least 48 hours before your appointment. If you cannot use the portal, arrive 30 minutes early to fill in paper forms.

If you have insurance, send your insurance details when booking so we can verify your plan (1 to 2 business days).

What to bring

A photo ID; your insurance card (if you have one); a list of the medicines you take; and X-rays from another dentist taken in the last 12 months, if available.

Arrival

Please arrive 15 minutes before your appointment. Parking is free in the building garage (levels P1 and P2); bring your ticket for validation.

What happens at the first visit

The first visit takes 60 to 75 minutes. It includes a review of your health history, a full set of X-rays, an oral cancer screening, a complete exam by the dentist and a personalized treatment plan.

The new patient exam with X-rays costs $145. A cleaning on the same day is possible if there is time in the schedule, and it is charged separately.

Children

We recommend a child's first dental visit by age 1, or within 6 months of the first tooth. Children's first visits are with Dr. Priya Nair and take about 30 minutes. A parent or legal guardian must stay with the child during the visit.

Anxious about the dentist?

Tell us when booking. We can schedule a short meet-and-greet visit with no treatment, at no cost, and you can bring headphones to listen to music during treatment.
